

If you can describe it, we can make it! Customs are standard with Leader Tech.

Leader Tech is recognized as a world leader in the design and manufacturing of custom circuit board shields. Our comprehensive, consultative approach provides you with virtually limitless board-level shielding options. Our team involvement starts with your initial design concept and continues through 3D modeling, prototyping, testing, tooling and low- to high-volume manufacturing.

We are pioneers in the development of new and innovative manufacturing techniques and processes. By relying on Leader Tech's decades of experience, you can develop a custom shielding solution that is manufactured using proven, standardized methods- ultimately lowering your product cost while increasing your flexibility.

The Ultimate Flexibility

- Unlimited shapes & sizes
- Unlimited material options
- Unlimited plating options
- Unlimited height- low to high
- One or two piece design
- Low volume prototype to high volume production
- Welding
- Soldering
- Combination shields
- Custom packaging
- Embossing

Leader Tech Benefits

- Complete design assistance and 3D modeling services
- Engineering assistance on existing "legacy" shields
- Universal tooling and manufacturing experience
- Cost containment options
- Low- and high-volume product capabilities
- Industry-best lead time
- U.S.-based manufacturing
